relating to the grant of Study leave. Are there precedents for treating Mr. Mascarenhas as having been deputed for study and allowing him his full pay?

7-11-11. Mll

There appear to be no precedents of officers of Govt deputed for study and allowed to draw full pay during the period of such deputation. Messrs Venkata Rao and Yagnanarayana Iyer Asst Chemists referred to in Mr. Mascarenhas appln are granted the leave to which they are respectively entitled and given Damodar Dass Scholarships to enable them to Study in Europe.

Med file 155-10 Sls 1 & 2 J. Feby '11 contains a Copy of the latest regulations regarding the grant of Study leave to officers of the Indian medical Service.

According to these regulations:—

(1) Study leave shall be allowed for a period of 1/2 of pension Service in the case of an officer under Military Leave rules and for a period of 1/12th of active Service in the case of an officer under Civil Leave rules.

(2) The total period of Study leave shall not—

Serial No.

exceed 12 months in all during an officer's Service

(3). Study leave may be taken at any time but not more than twice during an officer's Service

(4) The minimum period of Study ~~leave granted~~ which will render an officer eligible for Study leave shall be two months

(5) Study leave may be ~~Kind~~ Combined with any other kind of leave but the minimum period of leave granted solely as Study leave shall be 6 months.

~~(6)~~ (6) Study leave will count as Service for promotion and pension but, except, so far as it may be taken during privilege leave, it will not count for furlough or any other leave.

6 The rate of pay admissible during Study leave to an officer under Civil rules is calculated according to the rules contained in para 11 of the Regns. What the rates are exactly, cannot be ascertained without reference to the Civil & Military Leave rules therein referred to.

23. *Submitted to His Highness.*

Mr. J.V. Mascarenhas M.B. & C.M., Assistant Surgeon, Fifth class, has been granted 6 months' combined leave (3 months' privilege leave with 3 months' leave on private affairs) from August 1911, and he has proceeded to England to take courses in Tropical Medicine and Practical Sanitation for the D.P.H.

Pa'er under disposal

2. The Senior Surgeon has now sent up an application received from Mr. Mascarenhas in which he asks that he may be treated as having been deputed for study to Europe for a period of about 1½ years on full pay, or if this is not possible that he "may at least be given study leave for nine months in continuation of the leave already granted to him, as is done in British India and Baroda". The Senior Surgeon supports the latter prayer and recommends that during the period Mr. Mascarenhas may be allowed his full pay, viz. Rs.120 per mensem.

3. The Mysore Service Regulations do not contemplate the grant of study leave. The condition

under which study leave is granted in British India to officers of the Indian Medical Service are explained at pages 2 and 3 of the office notes. The Financial Secretary is in favour of reducing the leave allowance to half the pay, if at all there is any need for the grant of such leave, but the Senior Surgeon in his Un-Official note dated 13th January has given reasons why full pay should be given. This is also supported by the First Councillor.

Page 5. Ante

Page 2 of the Notes.

4. The proposal of the Senior Surgeon and the First Councillor is to grant 9 months' study leave on full pay to Mr. Mascarenhas by way of encouragement to our officers to go to Europe for purposes of study. This may be sanctioned.

From

P.S. Achyuta Rao Esquire,
~~Lt.-Col. John Smyth, M.D., I.M.S.,~~
Offg. *Senior Surgeon with the Government of*
H.H. the Maharaja of Mysore, Bangalore.

To

C.S. Balasundaram Iyer Esq. B.A.,
Offg Secretary to the Govt of H.H. the
Maharaja of Mysore, Genl & Rev Deptts.
Bangalore.

Sir,

I have the honor to forward a copy of an application received from Mr. J.V. Mascarenhas, M.B & C.M., Sub-Assistant Surgeon on leave, for favourable consideration and orders of the Government.

2. The applicant deserves some consideration & I would recommend his being granted study leave for nine months on full pay as is done in the British Service to enable the Medical Officers to keep in touch with the latest methods of treatment of diseases and up-to-date surgical & pathological knowledge.

I have the honor to be,

Sir,

Your most obedient servant,

J. V. Achyuta Rao

Offg Senior Surgeon, Mysore Govt.,

Application dated, 35 Mount Pleasent, Liverpool, 5th October 1911, from Sub Assistant Surgeon Mr. J.V.Mascarenhas, on leave, to the Offg Senior Surgeon, Mysore Govt.

With reference to Govt Notification No.118 Med 258-10-2 dated 7th July 1911, sanctioning for me privilege leave of 3 months with leave of 3 months on private affairs in continuation, I beg to state that after having availed myself of the leave, I took my passage to England, arrived at Liverpool on the 13th September 1911 and have arranged to take the following courses, viz,- Tropical Medicine and Practical Sanitation for the D.P.H. course.

2. A certificate from the School of Tropical Medicine is herein enclosed for your kind information.

3 I am willing to place myself as stated below entirely under your direction as to any other courses that I should take and I shall be very thankful for any suggestions that you may be pleased to make with regard to them.

4. I may state that I passed the M.B & C.M., examination of the Madras University in the year 1900, standing first in the list having been in receipt of a Government scholarship during my course in the Madras Medical College. As at that time the system of sending students with Government scholarships to study abroad had not been introduced, I entered the Mysore Medical Service on October 2nd 1900, and there being no permanent vacancy, I was taken in as Sub Assistant Surgeon temporarily in Plague duty. Soon after I was sent to Sivasamudram while the construction of the Cauvery Power Electrical Works was going on and the manner in which I discharged my duties will be evident from the reference made to my work by Major Lotbiniere and Mr. Hunter, a copy of which is added to this for perusal. Though owing to the general insanitary conditions of the place and the extremely malarious nature of the country, the Medical Officer's energies were taxed to the utmost to keep the officers, men and coolies in health, I think I earned the approbation of the then Senior Surgeon Surgeon General P.H. Benson, by my application to duty in

these

these trying circumstances with frequent outbreaks of epidemic diseases, who was induced to make more than one special recommendation on my behalf. To my misfortune the recommendations were of no benefit to me and I was the only one who risked his health in contributing to the success of the works that did not receive any substantial reward. I was, however, confirmed as Sub Assistant Surgeon on the 11th July 1902, i.e., nearly 2 years after I was in service, which period I have not been allowed to count towards my increment. I practically continued at Sivasamudram till 1906 except for a short break in 1903 when I served on the Resident Medical Officer in the Kolar Gold Fields Mines Hospital which gave me a good training and insight into the management of a large Institution. The manner I discharged my duties here may be gauged from the certificate of the then Chief Medical Officer Dr. T.J. O'Donnell, a copy of which is herein enclosed for your kind perusal. In his letter dated 12-2-05 the Superintending Engineer Mr Gibbs, the Chief Electrical Engineer refers to my services as being eminently satisfactory. In the year 1906, I was posted for duty in the Imperial Service Regiment and was also put in charge of the Transport Corps and a special allowance of Rs 50/- per mensem was sanctioned to me in consideration of the arduous nature of the duties and also of my being practically deprived of private practice. I have been in charge of the Regiment continuously since 1906 and an extract from the Report of inspection of Major General Drummond, Inspector General of the Imperial Service Troops in India (hereto attached) will bear testimony to the nature of the work done by me in the Hospital.

5. The Hospital has also been repeatedly inspected by H.H. the Maharaja, the Senior Surgeon, and the Chief Commandant, who have always been pleased to express their appreciation of my work. The high standard of general health maintained in the Regiment and the Transport Corps and the manner in which I have adapted myself to the requirements of the Regiment and prevented outbreaks of epidemic diseases will also speak to the interest taken by me in my work. Notwithstanding the

satisfaction

satisfaction that I have been able to give in my work in every capacity that I was entertained and the high opinions that have been expressed about me, I find that after nearly 10 years' service, I am still a Sub Assistant Surgeon with no prospects of being promoted to the Assistant Surgeon's grade in the near future. I may add that many of my juniors in the College are drawing Rs 200/- as pukka Assistant Surgeons in the Madras Medical Service, not to speak of the income they have been able to earn by private practice, while I for having patriotically accepted an appointment in the Mysore Service, seem to be destined ever to remain at the lowest rung of the ladder.

6. With a view to improve my prospects and also to go through a special course of training in Europe, I applied for a Damodar Doss scholarship in the year 1907 and though I was strongly recommended by your predecessor, the Government did not see their way to grant me one and also my request in 1909 to be paid my passage and full pay for purposes of study in Europe was similarly refused. I may mention however that shortly after Mr. R. Subba Rao was entertained in the Service he was given his full pay and allowed to study for the L.S.Sc. at Madras and several other Medical ~~Officers~~ Graduates have been given State help for study in Europe and two of them have already been provided with appointments in their return.

7. From some recent appointments, I find that Government attach special importance to European qualifications and so I have come here with the object of acquiring them and removing any impediments to my advancement. I need not adduce any arguments to an officer of your experience to shew that a Graduate of an Indian University who has had a distinguished College career and who has had both the inclination and opportunities to acquire a thorough experience of practical work is likely to derive greater benefit from such special studies than one who is quite new to independent work. In the Sanitary Department this applies with even greater force, as so much depends upon a knowledge of local conditions and needs. I think this was the reason why Dr. M.Srinivasa Rao,

Chemical

Chemical Examiner and Government Bacteriologist, Dr. P.Palpu Dr. A.K. Pani and Dr. C.A.Nanjappa were given special concessions and allowed to go through special courses long after they had entered the Service. In the case of other Departments I may refer to the recent cases of Mr. B.Venkat Rao Assistant Chemist, Mr. Yagna Narayana Rao Assistant Chemist, and Mr. Venkat Subba Shetty, Sub Assistant Engineer, Mr. R. Ranga Rao, Clerk Revenue and General Secretariat and Mr. B. Jayaram, Assistant Geologist. In the Baroda State, every Gazetted Medical Officer is given study leave on full pay for 6 months for Post Graduate studies in Europe. In the British Service instances are not wanting of men in service having been deputed for study to Europe and special facilities are afforded to all medical men in service to pursue studies abroad by the grant of special study leave. I beg to submit that a similar principle may be applied ih my case. It will be discouraging to officers in the Service and it must also affect their efficiency if their having entered the Service is treated as a bar for selection for special training.

8 I am prepared to undergo any special course that Government may direct me to undergo. At present as I am not certain what assistance I may ~~get~~ expect from Government towards my studies in Europe, I mean to take the Diploma in Tropical Medicine, and Diploma in Public Health as it is generally felt that the expansion of the Sanitary Department which is so essential to the well being of the people is greatly impeded by paucity of qualified men. If there is any branch of Public Health in the service in which it will be for the benefit of the State that I should specialize myself, I am prepared to do so, and if Government should feel any doubt as to my competence, I shall be willing to produce a report from some Professor of standing regarding my competence for such training.

9 At the present day as you are aware there is a tendency for the greatest possible specialization in all branches of medicine & surgery. To mention a few Chemical Pathology has taken an important place now in the treatment of

diseases

diseases and it will add greatly to the utility of our Hospitals if we had some one who had made a special study of it. The study of dentistry is also very important. I shall be glad if so directed to take up the study of any special diseases or modes of treatment by attending the Hospitals devoted to them.

10 The six months leave that I have taken will not be sufficient even for the D.P.H. I beg therefore that I may be treated as having been deputed for study to Europe for a period of 1½ years or other period which the special courses I am required to take up may occupy and be given my full pay for the period as was done in the case of Drs. C.A. Nanjappa & R. Subba Rao, M.B., L.S.Sc., If it is not possible to comply with this request for any reason, I may at least be given study leave for 9 months in continuation of the leave already granted to me, as is done in British India and Baroda.

11. I can assure you that I shall endeavour to deserve in every way any concessions that may be granted to me by Government. I also beg to express my regret that I was not able to address you in the matter before I left India, as I had to join the College on 15th of September and I had no time to mature my plans and address you in time to enable you to obtain the orders of Government before I could sail without losing another year.

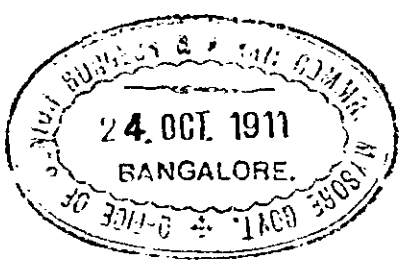
Professor of Tropical Medicine.



From:-

Lieut James Hunter,

Resident Engineer,

Cauvery Power Scheme Division.

To:-

The Deputy Chief Engineer of Mysore,

Bangalore.

Dated, 14-8-'02. No.483.

Mr. J.V. Mascarenhas, Sub-Assistant Surgeon. C.P.S.

Sir,

I have the honor on completion of these works to bring the services of the officer named above, to your notice, in the hope that you will be enabled to recommend him to the Principal Medical Officer, the Head of his Department. Mr. Mascarenhas who has been in Medical charge here since 14-3-'01, has done exceptionally good work. The labor employed at Sivasamudram, reached for some twelve months, fully 5000/ and with a serious outbreak of cholera a few months ago, followed by the appearance of plague on the bluff itself, the duties of the Medical Officer have been very arduous.

To the prompt and energetic measures adopted by Mr. Mascarenhas, in the through disinfection and cleaning of the quarters under his personal supervision, may it is thought, be attributed the failure of the plague to spread among the officials quartered on the bluff at Siva Samudrom, where but two fatilities occurred from that fell disease. Mr. Mascarenhas has also worked throughout in cheerful co-operation with this Department.

I have &c.,

(Signed) JAMES HUNTER LT.
Resident Engineer. C.P.S. Dn.

No. 1208.
14/8/02.

MEMO.

Copy of the above is forwarded to Mr. Mascarenhas, Asst. Surgeon for information. (Sg). JAS HUNTER. LT. RESIDENT ENG.
Cauvery Power Scheme Division.

Letter No. 1796-C. dated the 27th. December 1910, from Major General F.H.R. Drummond, C.B., C.I.E., Inspector General Imperial Service Troops, Bangalore to the Hon'ble the Resident in Mysore.

= =

I have the honour to inform you that I have finished my inspection of the Mysore Imperial Service Lancers, and am glad to be able to tell you that I consider the regiment is fit for active service, both as regards training in the Field equipment first and second line transport, and mobilisation equipment.

2. I inspected the Regiment in the field, and was satisfied with the way in which the squadrons moved across country, both patrol work and scouting being distinctly good. Officers led their squadrons through a somewhat difficult country with confidence and intelligence, and it is apparent that they have grasped tactical principles and are able to apply their knowledge. Some progress has been made in the higher training of the commissioned ranks.

3. I inspected the mobilisation equipment at the Military Stores and found them complete in good order. Mobilization stores in possession of the Regiment are also complete and well kept.

4. I also inspected remounts, recruits hospital, horse lines and horse hospital.

5. Remounts lately purchased by Major Henderson and Lieut. Colonel Desaraj Urs are of good stamp, and I am glad to note that a somewhat smaller animal, is now being purchased for the Regiment.

6. Stable management, grooming, and condition of the horse show distinct and satisfactory improvement.

7. The recruits appear to be of good physique, are young, well set up and enlisted within the State territories.

8. The men's hospital is kept in admirable order and all field service equipment is complete.

9. I visited the new Rifle Range and am glad to see that it has been extended up to 800 yards. I recommend that, with a view to practice for Rifle Competitions the range, be completed up to 1000 yards. From 700 yards up to 800 yards slight alterations are necessary to enable the full number of targets to be used, as at present only four out of six targets come into view from the various firing platform. As it is the four targets which can be used are only visible from one end of the firing platform.

10. I am of opinion that great credit is due to the Inspecting Officer and all concerned for the great progress which has been made.
